Promogen Scores

1. The system uses a numerical score of 1 to 6.
2. Animals with scores of less than 4 are not producing the three marker proteins we are measuring at physiologically effective levels
3. Animals scoring between 4 to 4.5 are producing the three marker proteins at levels that are physiologically average
4. Animals scoring between 4.5 to 5 are in the top 25% of the populations we have tested. This includes both beef and dairy cattle.

5. Animals scoring over 5 are in the top 5%.
6. Animals scoring 6 are in the top 1%. We believe that these individuals are extraordinary.
