Roseda Farm

If you don't sell your cattle by the pound, most likely your customers do. At Roseda Farm, we buy and sell cattle and beef by the pound every day to support our branded beef program. Our genetics are required to perform up and down our vertically coordinated supply chain from the cow/calf producer to the consumer.

B103 represents a genetic package that works well for our program and for Powell Farms, Limestone, TN, whom we want to thank for purchasing an interest in B103 giving her a value of \$100,000.

Powell Farms has similar selection criteria as Roseda in that they want cattle that can grow and marble while paying close attention to calving ease and maternal traits.

B103 ranks in the top 1% for WW, YW, and Marb. When you search current sires and dams, nothing can match her **RARE** combination of YW and Marb. When you search non-parent bulls, her first grandson, F091 is the only bull that pops up.

In terms of maternal, B103 ranks in the top 1% for WW and \$W with an acceptable milk EPD. All this comes in a moderate birth weight, easing calving package, ranking in the top 15% for CED.

B103 has been in an intense IVF program for the last year with both Powell Farms and Roseda Farms accumulating a nice inventory of pregnancies and frozen embryos. We look for great things to develop from this outstanding donor.

Please contact or visit Roseda Farm or Powell Farms for more information regarding B103 progeny.

Contact us or visit our website for additional information.
