The Powerplant Crew are all sired by our very own herd sire, Roseda Powerplant, that sold to Alta Genetics for \$70,000 in the 2022 National Angus Bull Sale in OKC. True to the Roseda breeding program, they excel in calving ease, growth, and marbling plus they have "the Look" that you will appreciate. We selected the Powerplant Crew from his first set of calves.

Roseda Powerplant Foreman is our leadoff bull for the pen show and our entry in the National Angus Bull Sale. He is the Roseda program with 10 generations of Roseda breeding on the bottom side of the pedigree and eight generations on the top side. He reflects our commitment to produce genetics that work for all segments of the industry with calving ease (CE +16, BW -1.4), growth (YW +143) and high carcass merit (Marb +1.85, RE +1.13) with top 40% \$M and top 1% \$C (+370).

Plus, he is in the top 30% or better for HP, Claw, Angle, PAP and hair shedding. He is a bull that can improve a whole population for a multitude of traits.

For the Pen Show, Foreman is joined by two flush brothers and a maternal brother Roseda Chesapeake. Please stop by our pen at the Cattlemen's Congress in OKC.
